

Our Quality Statement

Refurbished FUJIFILM FinePix Digital Cameras offer you the opportunity to purchase a refurbished FinePix digital camera at a substantially reduced price. Digital cameras are returned from Fujifilm's retailers for a variety of reasons. Every FinePix digital camera that is returned goes through an extensive inspection and evaluation process by Fujifilm trained technicians. Every refurbished camera is refurbished as necessary so that the camera will function in the same manner as the equivalent new FinePix digital camera. Please note that refurbished FinePix digital cameras may nevertheless contain minor external scratches or cosmetic blemishes that do not impair camera operation. Refurbished FinePix digital cameras will include all accessories necessary for basic camera operation, but may not contain all accessories originally sold with the equivalent new camera version. All refurbished FinePix digital cameras are backed by a 90 Day USA Limited Warranty covering defects in workmanship and materials, excluding cosmetic blemishes. If your refurbished FinePix digital camera is found to be defective pursuant to the above-referenced warranty, it will either be replaced or repaired at the sole discretion of Fujifilm USA. Unless specifically stated otherwise, Fujifilm USA refurbished FinePix digital cameras are not packaged in factory original retail packaging and are not eligible for Fujifilm USA consumer rebates or special offers that may be in effect for new cameras.
